

FLAT GLASS AND GLASS BOTTLE

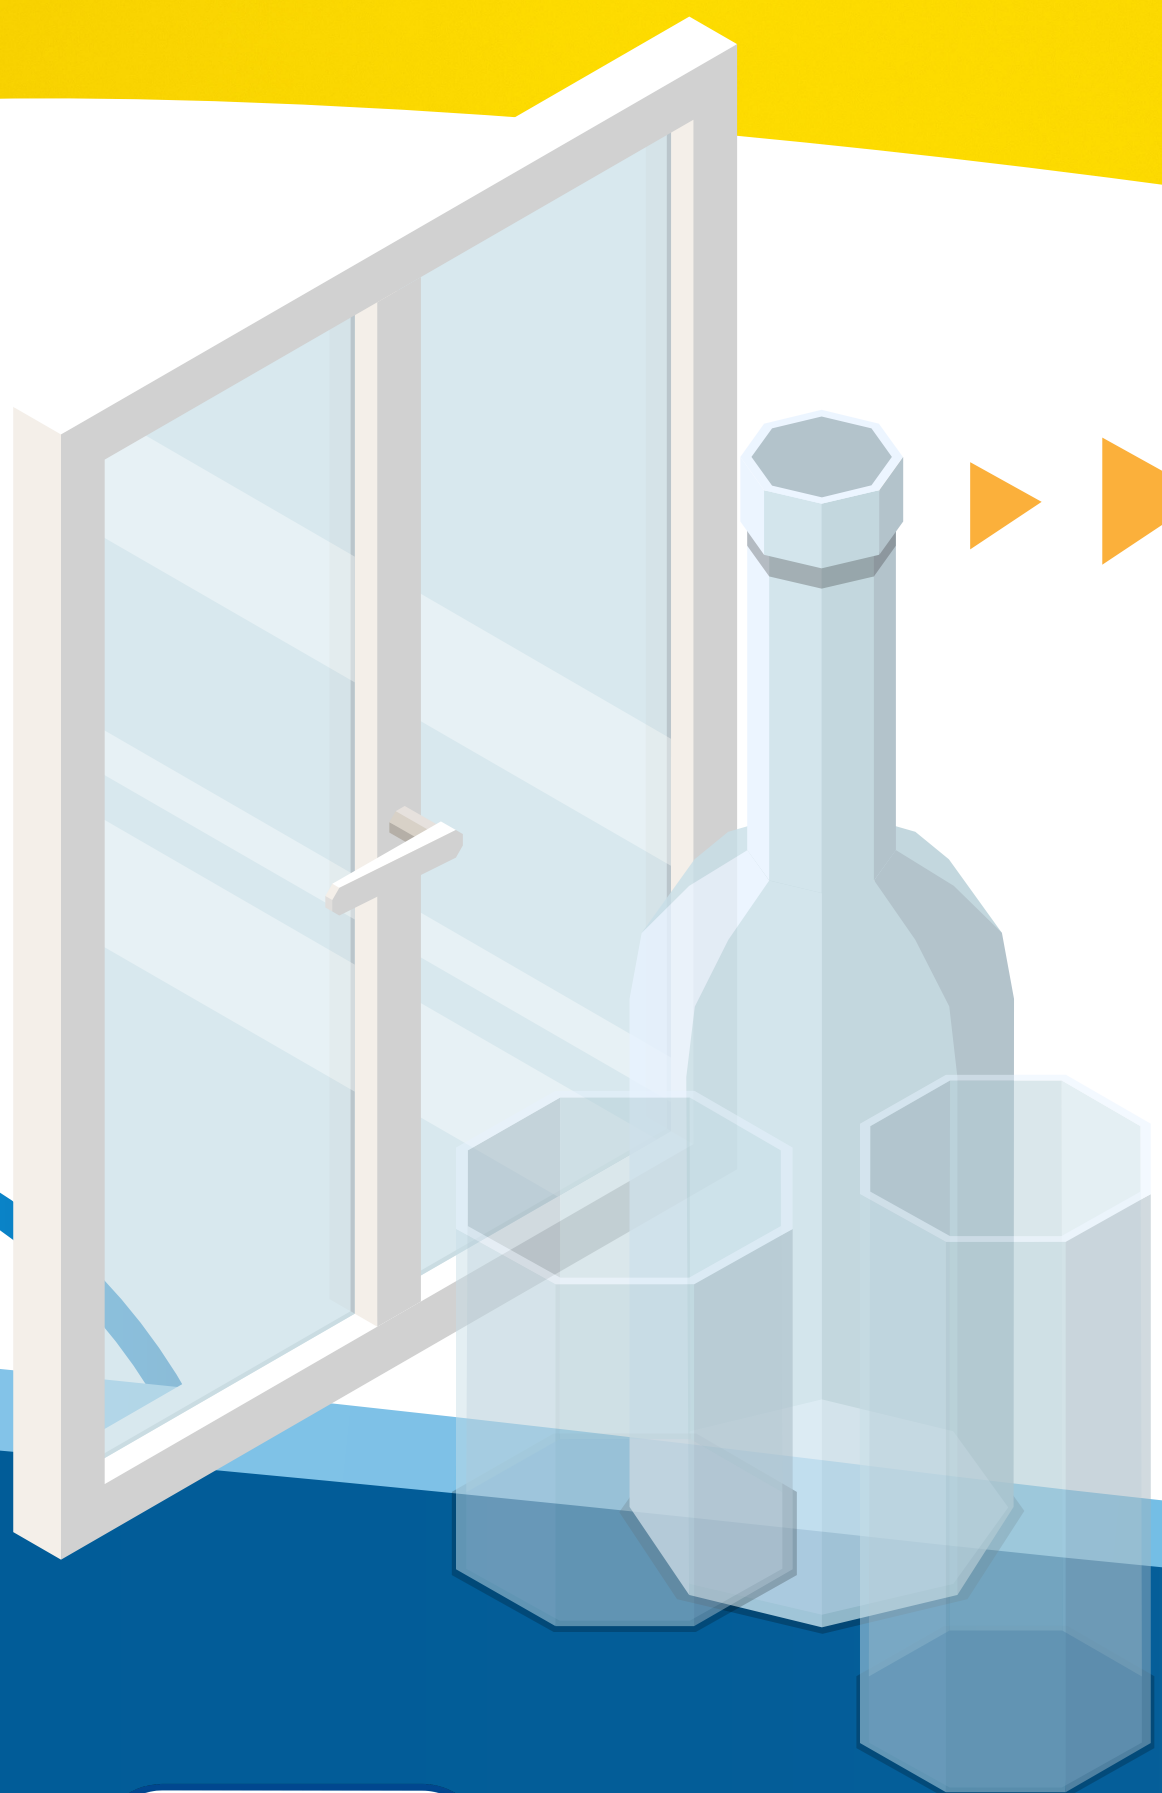

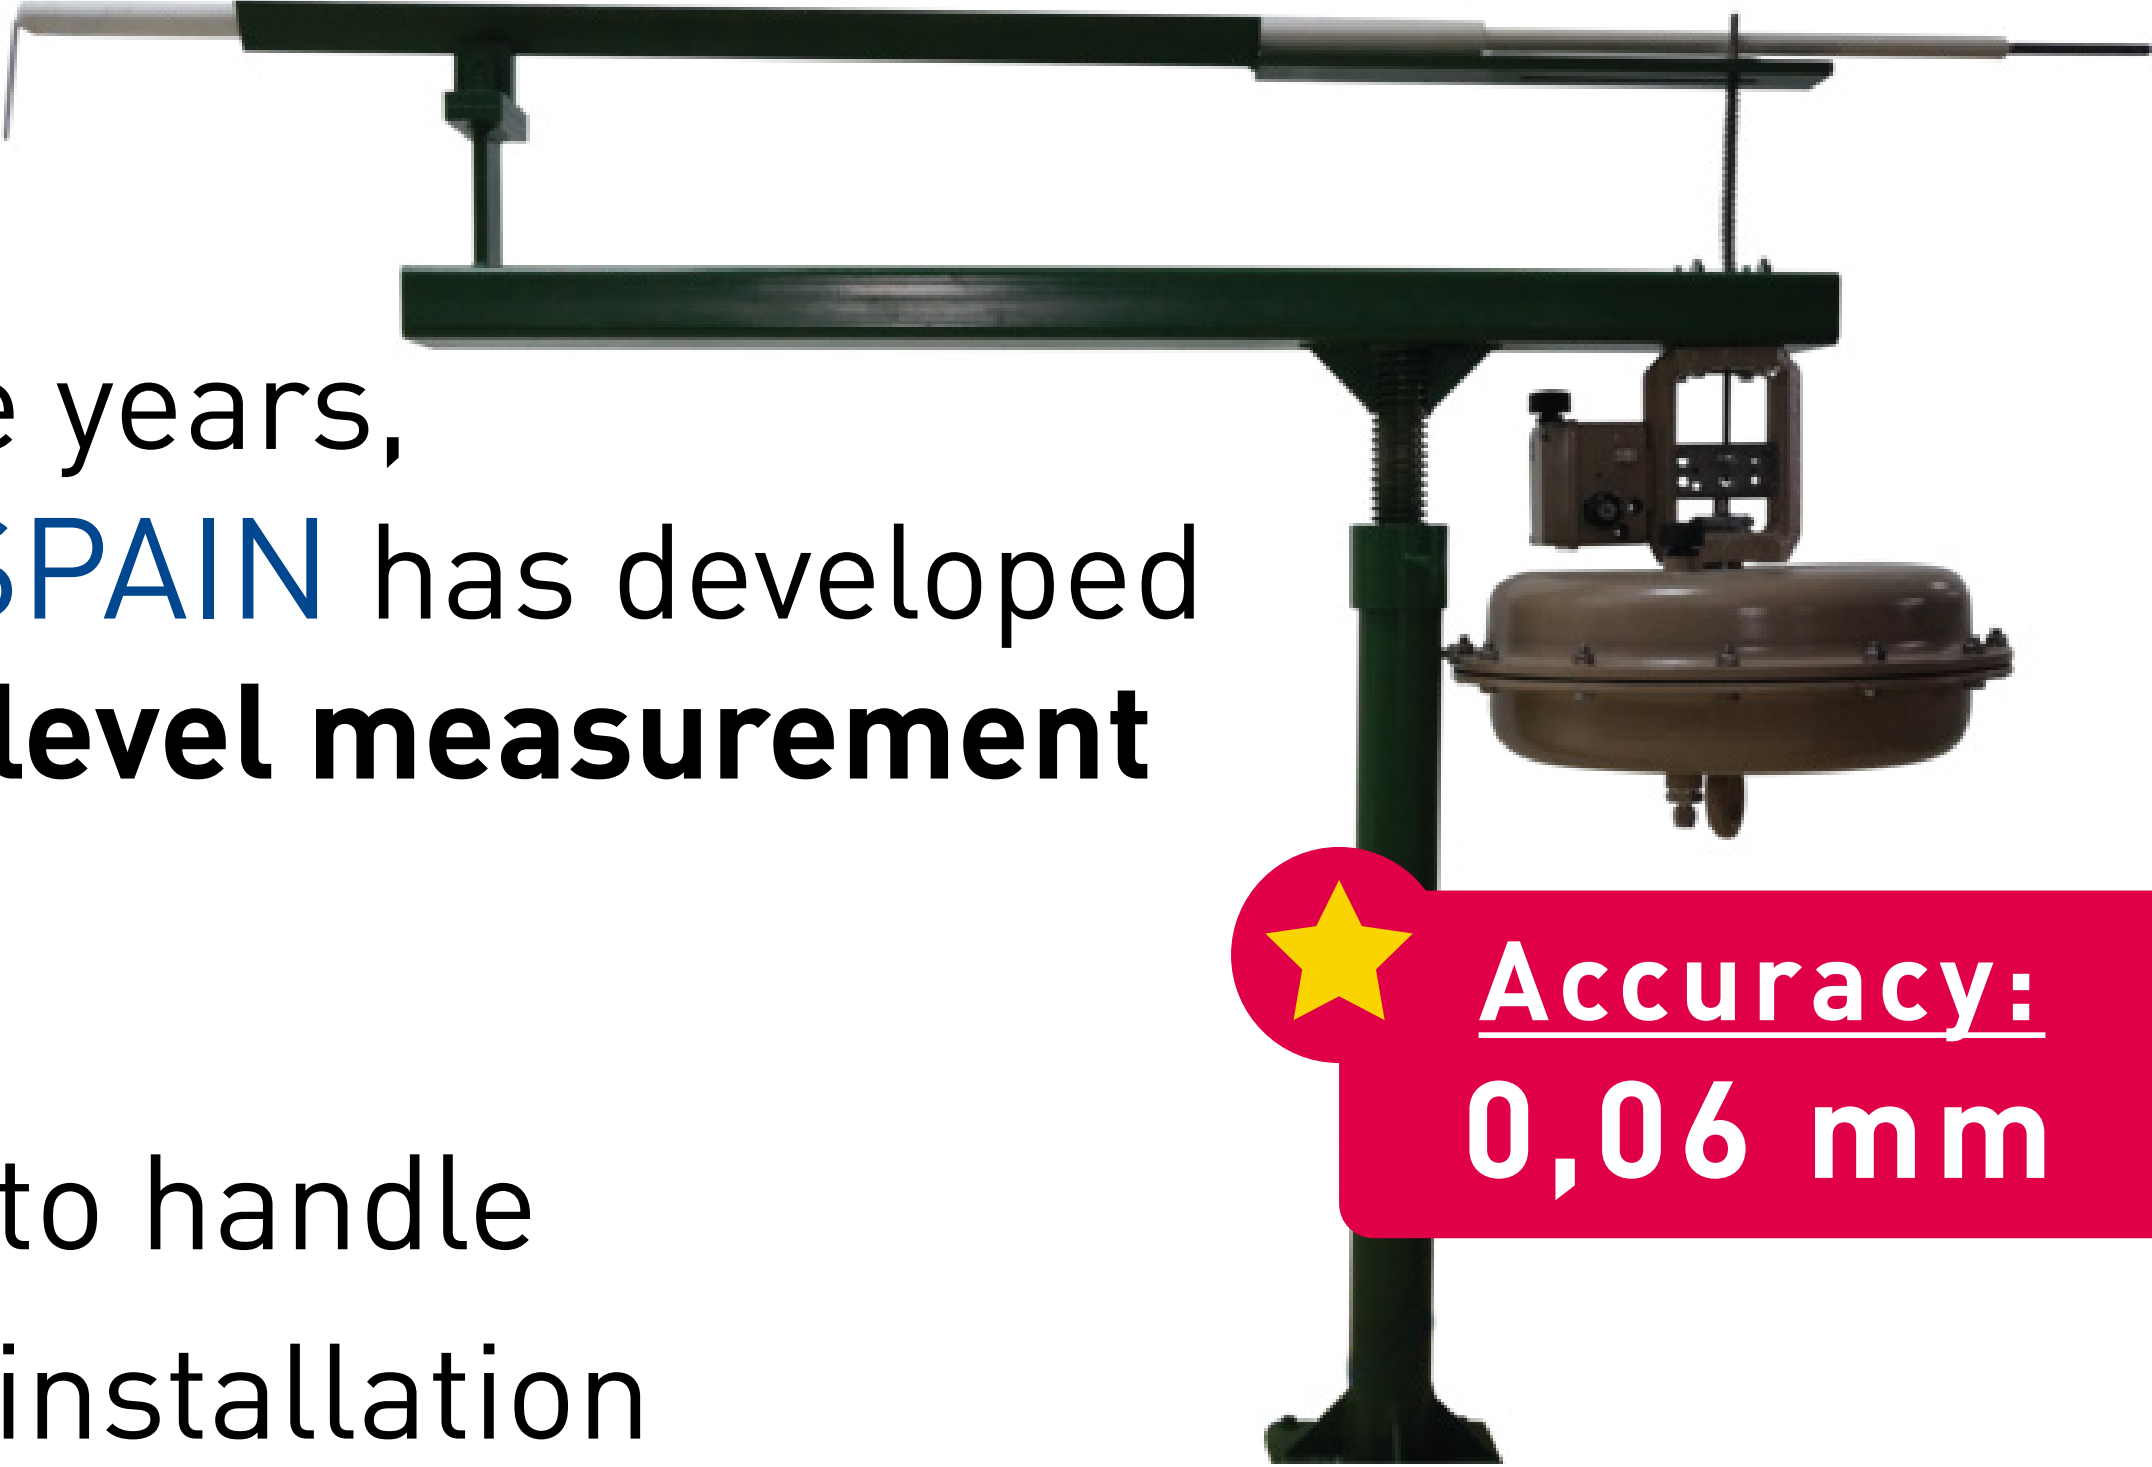

Melting furnace, continuous glass level measurement and control, essential in both flat glass and bottle manufacturing process.

JUMO glass level sensor provides real time, reliable information related to the extraction rate from the melting furnace.

▶ ▶ JUMO has been working in the **Glass Industry** for more than **40 years.**

Over the years,
JUMO SPAIN has developed
a **glass level measurement
system**.

- ▶ Easy to handle
- ▶ Easy installation
- ▶ Without messy cooling systems
- ▶ Easy maintenance

Accuracy:
0,06 mm

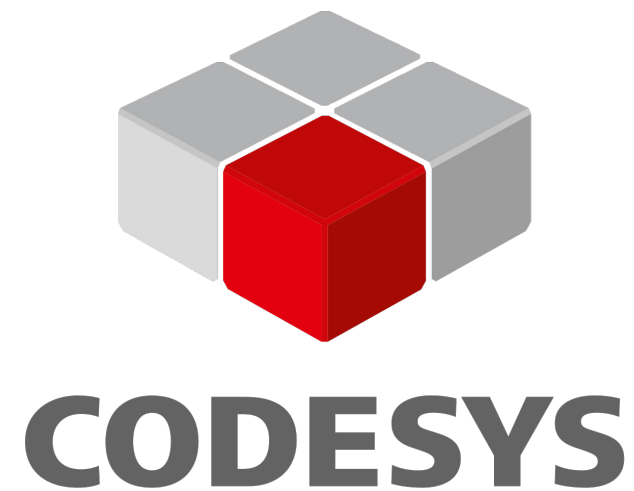

**more
than**

20

measurements
systems deployed
worldwide.

CONTROL PANEL

- **Jumo m-TRON T**
make it easy to deploy
and providing all
essential data in
one screen.

★ Recording is also available

- With essential display
requirements on the screen

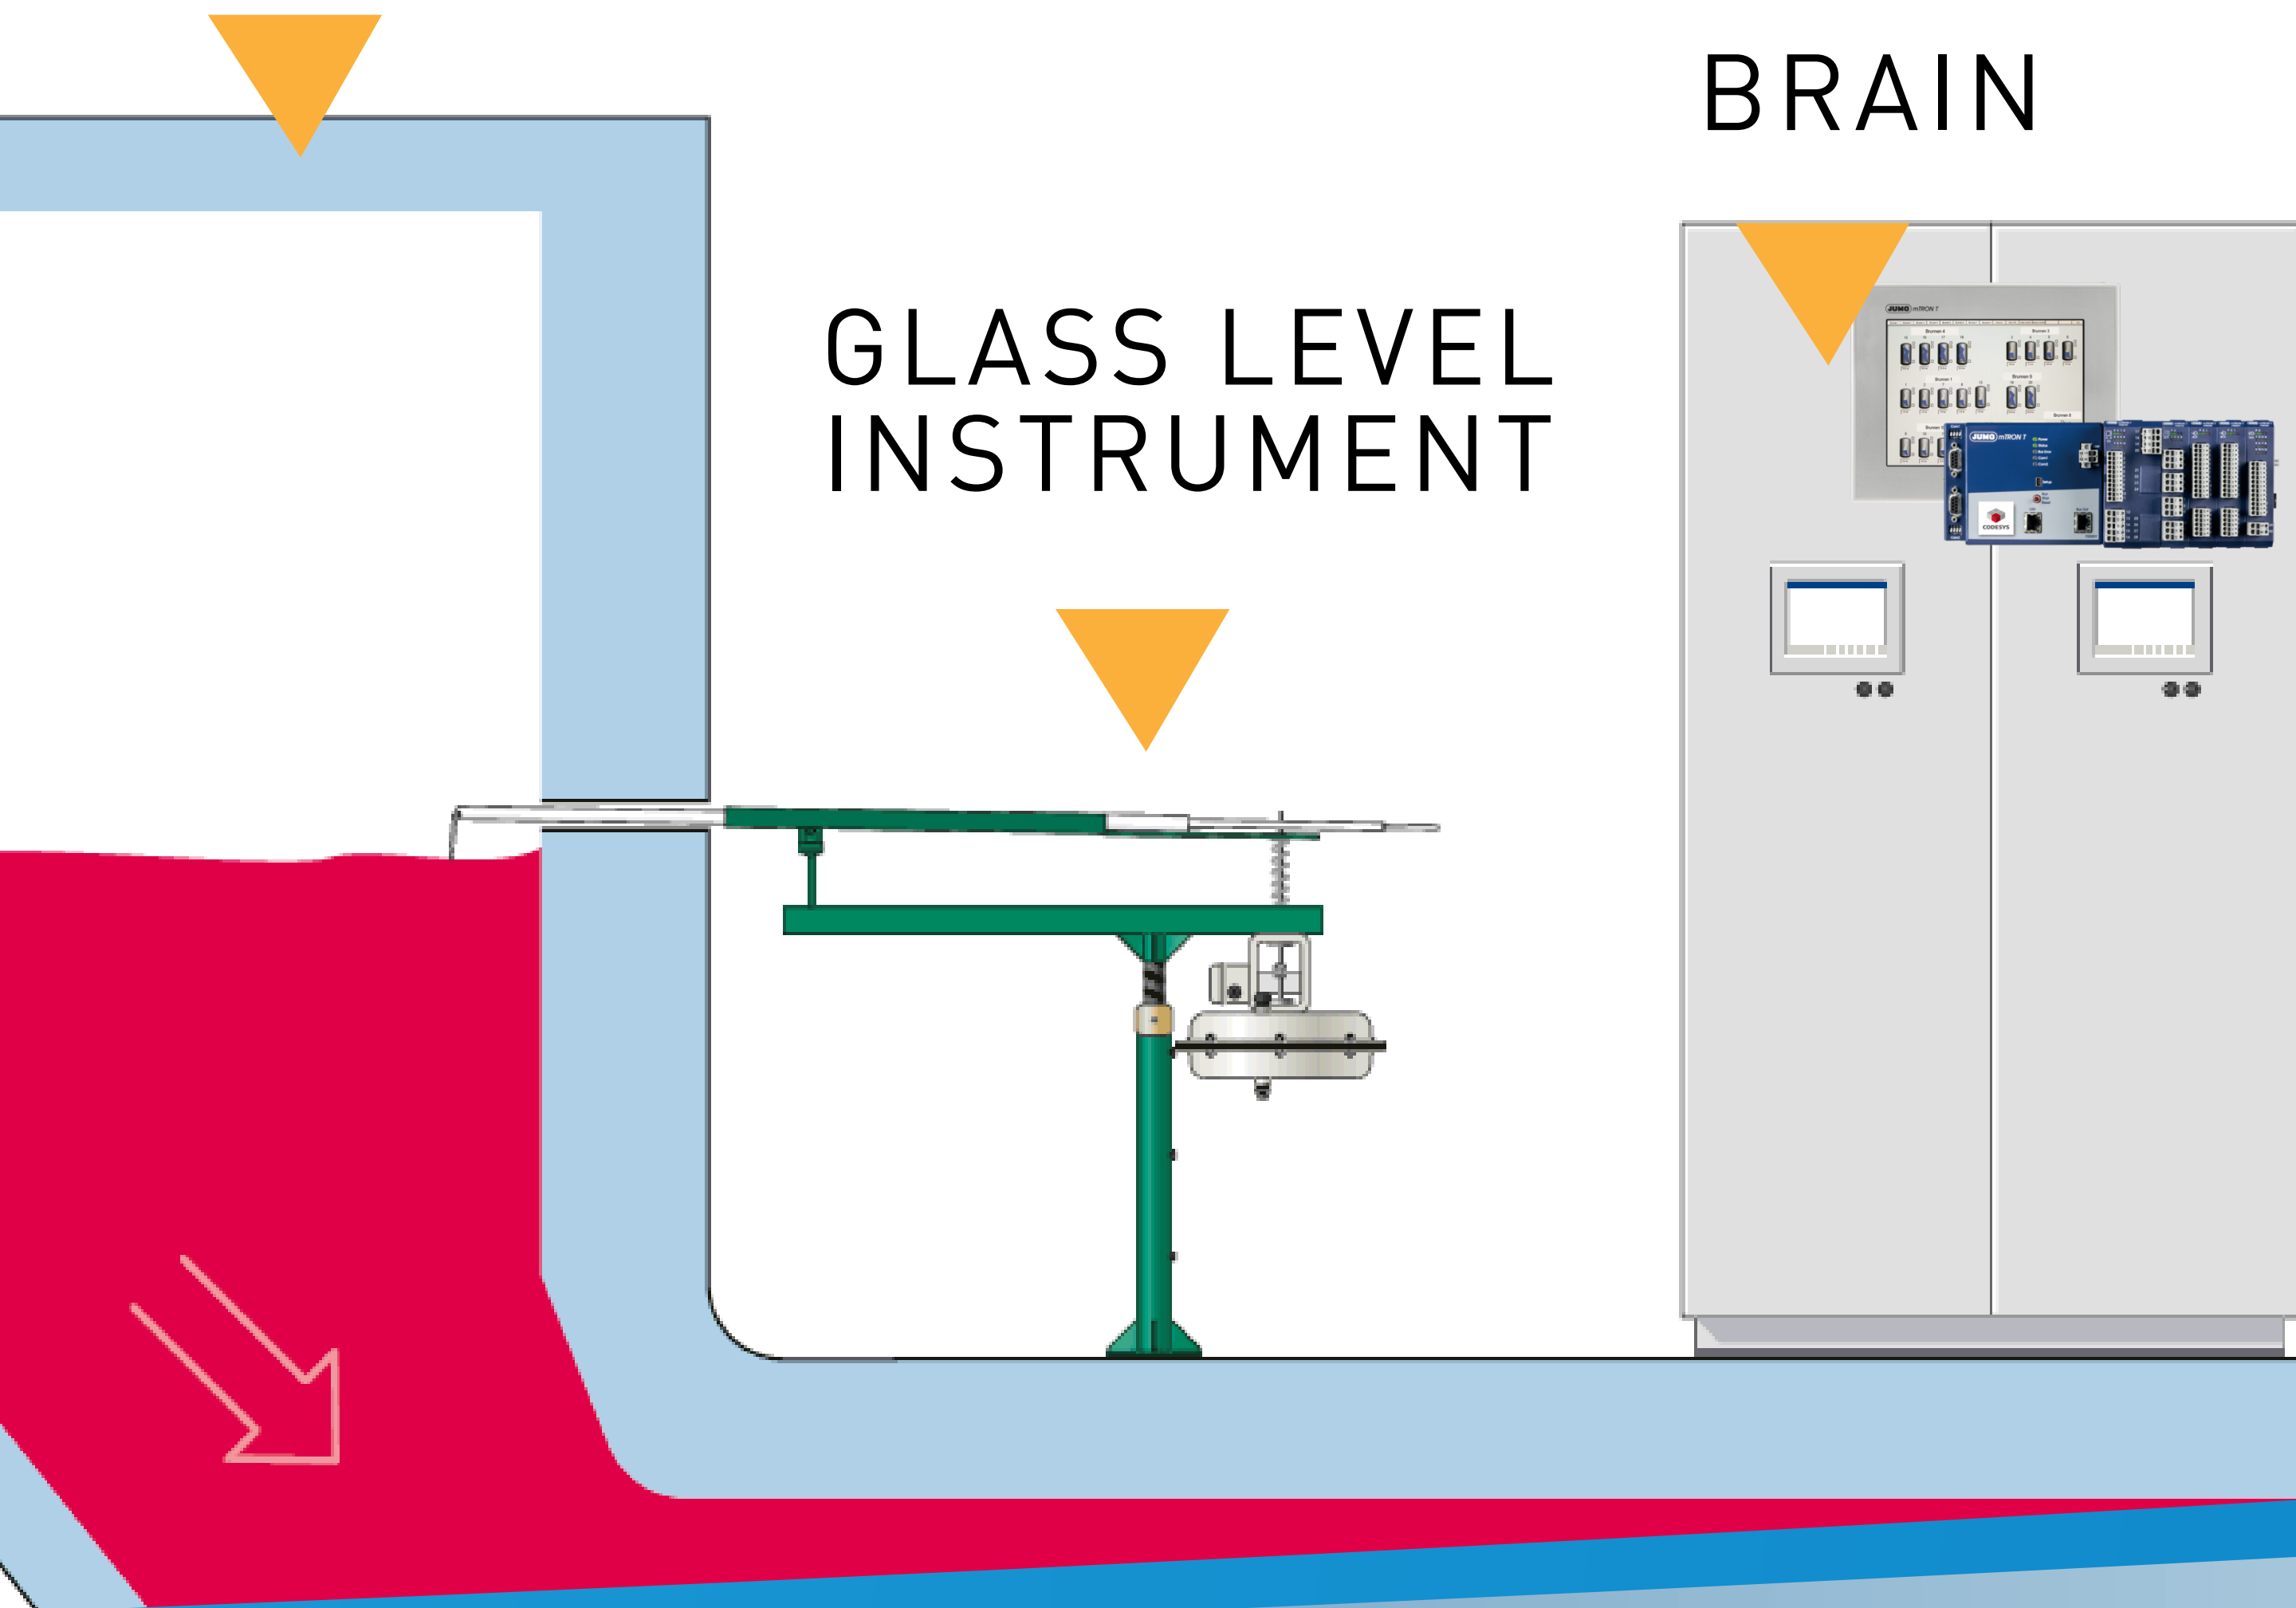

2 possibilities of fitting: Horizontal or Vertical.

Both systems contain the same pneumatic and electrical system for their operation, each with its own particular advantages.
